YEARS²

Not all Round Breast Implants are the Same

PROVEN

Performance

MENTOR® Breast Implants are backed by substantial clinical data demonstrating safety and effectiveness in both augmentation and reconstruction, including 10-year clinical trials.¹²

Design

Each profile in the MENTOR® MemoryGel® Breast Implant family contains proprietary and dynamic fill ratios developed from surgeon feedback.¹⁴

Peace of Mind

As one of the world's leading maker of high quality breast implants for over 30 years, our experience results in quality products that you can rely on and are backed by a comprehensive warranty.^{2,3}

Mentor® MemoryGel® Breast Implants in Primary Augmentation Patients

What does The Mentor® Level 2 Core Study Say at 10 years?

Made from a uniquely formulated, cohesive gel that acts more like a solid rather than a liquid¹³

Dynamic fill ratios for varying degrees of firmness⁶

MemoryGel® Breast Implant shells have 30% higher tensile strength versus another Breast Implant manufacturer shells¹⁷

Shell designed to minimize silicone gel bleed⁵

Automated manufacturing process for consistent quality¹⁵

Surfaces You Can Trust

MENTOR®
Smooth Breast
Implants

Slower bacterial growth compared to Allergan®, Motiva®, Eurosilicone®, Polytech® POLYtxt®, Nagor® Nagotex®**⁹

Lowest adherence and growth for bacteria associated with capsular contracture and biofilm formation*⁹

MENTOR® SILTEX®
Microtextured†
Implants

Consistently demonstrate lower rates of BIA-ALCL compared with high-surface area textured implants⁸

¹ Head-to-head testing according to industry standard ASTM D412 test method for rubber properties in tension (v. 0901) between MemoryGel® (n=10) and Natrelle Inspira (n=10). Mentor Implant Shell Mechanical Properties between Allergan Natrelle and MemoryGel Xtra - August 2017

² Based on in vitro testing as compared to Silimed Polyurethane, Eurosilicone™ Textured, Allergan® Biocell®, Nagor™ Nagotex®, Polytech POLYtxt®, Mentor® Siltex®, Motiva Implants® VelvetSurface™, Motiva Implants® SilkSurface®, Allergan® Smooth, Sientra® Smooth.

³ According to ISO 14607.

IMPORTANT SAFETY INFORMATION

MENTOR® MemoryGel® Breast Implants are indicated for breast augmentation, in women who are at least 18 years old, or for breast reconstruction. Breast implant surgery should not be performed in those women with active infection anywhere in their body, those with existing cancer or pre-cancer of their breast(s), those who have not received adequate treatment for these conditions or those who are pregnant or nursing. There are risks associated with breast implant surgery. Breast implants are not lifetime devices and breast implantation are not necessarily a one-time surgery. The most common complications with MENTOR® MemoryGel® Breast Implants include re-operation, implant removal, capsular contracture, asymmetry, and breast pain. A lower risk of complication is implant rupture, which is most often silent. The health consequences of a ruptured silicone gel-filled breast implant have not been fully established. Screenings such as mammography, MRI, or ultrasound are recommended after initial implant surgery to assist in detecting implant rupture. Breast implants are also associated with the risk of breast implant-associated anaplastic large cell lymphoma (BIA-ALCL), an uncommon type of lymphoma. An individual's risk of developing BIA-ALCL with MENTOR® Breast Implants is low based on the incidence of worldwide cases. Your patient needs to be informed and understand the risks and benefits of breast implants, and she should be provided with an opportunity to consult with you prior to deciding on surgery. For detailed indications, contraindications, warnings and precautions associated with the use of all MENTOR® Implantable Devices, please refer to the Product Insert Data Sheet provided with each product or review the Important Safety Information provided at www.mentorwllc.eu.
