

DORO®

Cranial Stabilization & Retractor Systems

Thank you

for your interest in our products!

Because we share your sense for precision, quality is in everything we do. PMI proudly stands behind our state-of-the-art solutions which are designed to support you in your daily tasks.

The PMI team is committed to excellence in the field of neuroscience. We are devoted to improving surgical performance and patient care by delivering high-value products and services that make a difference.

Cranial Stabilization

Rigid & Non-Invasive Headrest Systems

Firm positioning of the cranium is essential during neurosurgical procedures for patient safety and the overall outcome of the surgical approach, especially when using technologies like microscopes or navigation. We are driven to create solutions which ensure stability and safety, and provide the strength and flexibility to perform at your very best - whatever your next case might be."

DORO® QR3 Headrest System

The DORO® QR3 Headrest System is developed for daily use in non-imaging neurosurgical applications. Features like built-in navigation adaptor interfaces and Mix & Match compatibility with DORO® Radiolucent products make it a time-saving and versatile device.

DORO® QR3 Headrest System

Item no. 1001.100

(shown with DORO® Skull Pins)

Included Items	Item no.
DORO® QR3 Skull Clamp	1001.001
DORO® Swivel Adaptor Aluminum	3002-00
DORO® Base Unit Aluminum	3001-00

DORO® Storage Case Headrest System

Item no. 1001.030
(optionally available).

Versatile

With the DORO® QR3 Skull Clamp as a basis, you are free to enhance the set-up to what suits you best. Retractor arms, entire retractor systems or navigation adaptors – It all fits.

Intuitive

Fast and easy mounting frees up resources for the rest of your surgery preparations.

Compatible

Can directly be attached to an OR table via the neuro interface or mounted to its side-rails by means of the DORO® Side Rail Adaptors (page 10). You can also Mix & Match it with radiolucent DORO® products (page 23).

DORO® QR3 Headrest System
Item no. 1001.100

DORO® QR3 Skull Clamp

Easy to Read Pressure Scale
Metric and imperial units.

Reduced Risk of Lacerations
No play between archholder and skull base when locked.

Precise Navigation
Navigation tracking device adaptors (page 10) can easily be attached in close proximity to the surgical field.

Spacious
Due to its unique shape there is always enough free space to place the intubation tube, even in prone position.

Easy, Safe and Stable Interface
Attach DORO LUNA®, DORO COBRA® or Quick-Clamp products to the form-fitting Quick-Rail® interface (Infobox below).

DORO® QR3 Skull Clamp
Item no. 1001.001

Stable
Minimum play between the skull clamp base and the extension arm ensures high stability and a reduced risk to lost navigation.

DORO®
QR3

Quick-Rail® - An Innovative Interface

The term QR3 refers to the 3rd generation of our innovative Quick-Rail® technology which is directly implemented in the extension arms of our aluminum skull clamps. Due to its unique shape it can easily be located, even when covered by multiple layers of sterile drape. The Quick-Rail® serves as a form-fitting interface, ensuring reliable attachment of DORO® Retractor Systems and accessories.

DORO® Swivel Adaptors

DORO® Swivel Adaptors are the connecting elements between DORO® Skull Clamps and DORO® Base Units. Versions offering additional height, pivoting features and additional starbursts are available.

DORO® Swivel Adaptor
Item no. 3002-00

Provides 360° rotation for optimum flexibility in patient positioning.

DORO® Ball Pivot Adaptor
Item no. 3002-50

Provides 360° rotation, additional height, pivoting and unique horizontal inclination up to 90° for maximum flexibility in patient positioning.

DORO® Swivel Adaptor Navigation
Item no. 3002-60

Provides 360° rotation and two additional starbursts for increased options in mounting navigational or similar devices.

DORO® Aluminum Base Units

DORO® Base Units are individually designed for specific OR tables. Additionally, you can attach DORO® Base Units to almost all common OR tables with DORO® Side Rail OR Table Adaptors (page 10).

DORO® Adjustable Base Unit
Item no. 3001-00

**DORO® Adjustable Base Unit
Takara Belmont**
Item no. 3001-001

**DORO® Adjustable Base Unit
Mizuho**
Item no. 3001-002 | **Mizuho, short**
Item no. 1001.023

**DORO® Adjustable Base Unit
Eschmann**
Item no. 3001-003

**DORO® Adjustable Base Unit
Eschmann T-Series**
Item no. 3001-010

**DORO® Adjustable Base Unit
Australia**
Item no. 3001-008

DORO® Base Unit Parkbench

The DORO® Base Unit Parkbench is the perfect solution for lateral patient positioning. Its design allows the safe and comfortable positioning of the patient's arm, resulting in a reduced risk of hematomas. The Base Unit Parkbench is adjustable in width and attaches to almost all standard side-rails.

DORO® Base Unit Parkbench
Item no. 3001-006

Trumpf Universal Side Rail Fitting
Item no. 3007-50

Connects the Armrest Parkbench to the DORO® Base Unit Parkbench.

Stryker Armrest Parkbench
Item no. 3001-007

DORO® Crossbar Adaptor

The DORO® Crossbar Adaptor is the perfect solution for all approaches requiring a patient in sitting position. It can be mounted to the side-rails of almost all standard OR tables and provides a stable interface for the DORO® QR3 Headrest System.

DORO® Crossbar
Adaptor
Item no. 3007-00

Needs 2x Universal Side Rail
Fittings (item no. 3007-50,
see above).

DORO® Aluminum OR Table Adaptors

DORO® Table Adaptor
Item no. 3010-00

Mounted on square receptacle of OR table.

DORO® Side Rail OR Table Adaptor
Item no. 3011-00

Width-adjustable universal neuro interface, fitting OR tables with bars up to 70 mm.

DORO® Side Rail OR Table Adaptor AMSCO®
Item no. 3011-10

Width-adjustable universal neuro interface, fitting OR tables with bars up to 125 mm.

AMSCO® Headrest Adaptor
Item no. 3011-11

Fits 3080 & 3085 series.

DORO® Easy Connect Navigation Adaptors

DORO® Easy Connect Navigation Adaptors connect directly to the integrated navigation starburst on the Quick-Rail® of the DORO® QR3 Skull Clamp, DORO® Multi-Purpose Skull Clamp and DORO® Skull Clamp Teflon®. This provides a very stable and secure connection and allows positioning the navigation reference array close to the surgical target.

DORO® Easy Connect Navigation Adaptor
Stryker®
Item no. 1204.001

(Shown with Stryker navigation reference array).

DORO® Easy Connect Navigation Adaptor
Brainlab
Item no. 1204.002

(Shown with Brainlab navigation reference array).

High-End Imaging

Perfect balance of imaging quality and pin stability. The DORO LUCENT® Disposable Skull Pin is specifically designed for intra-operative imaging applications using CT, MRI, X-Ray and Fluoroscopy. Imaging artifacts are reduced to a minimum while the composition of a titanium tip and high-performance reinforced polymer ensures a precise, secure and rigid fixation of the patient's head.

Item no. 1106.103 (9 pins)

DORO® QR3 Headrest System Teflon®

The DORO® QR3 Headrest System Teflon® is the sterilizable counterpart of our well-established DORO® Headrest System Aluminum. Its autoclavability is a major plus when you are treating highly infectious patients.

DORO® QR3 Headrest System Teflon®

Item no. 3003-100
(shown with DORO® Skull Pins)

Included Items	Item no.
DORO® Skull Clamp Teflon®	3003-009
DORO® Swivel Adaptor Teflon®	3002-009
DORO® Adjustable Base Unit Teflon®	3001-009

Precise Navigation

Navigation tracking device adaptors (page 10) can easily be attached in close proximity to the surgical field.

Easy, Safe and Stable Connection

Attach DORO LUNA®, DORO COBRA® or Quick-Clamp products to the form-fitting Quick-Rail® interface.

Autoclavable

The Teflon® coated surface of DORO® QR3 Headrest System Teflon® makes it machine-washable and autoclavable. It conforms to World Health Organization (WHO) Infection Control Guidelines for cleaning and sterilization.

DORO® Storage Case
Headrest System
Item no. 1001.030
(optionally available).

DORO® QR3 Headrest System
Teflon®
Item no. 3003-100

**Skeletal Traction Option**

An extension bar is optionally available.

Proper Patient Positioning

All DORO® Horseshoe Headrests are adjustable in width.

One Base Fits All

Mount adult or pediatric gel pads to the same horseshoe base.

Adult versions

DORO® Swivel Horseshoe Headrest System, Adult with Extension Bar

Item no. 3009-00

Included Items	Item no.
DORO® Horseshoe Base	3009-01
DORO® Horseshoe Pad, Adult, right	3009-10
DORO® Horseshoe Pad, Adult, left	3009-11

DORO® Accessories

DORO® Cervical Spine Support
Item no. 3012-00
Neck support for anterior spine surgery.

DORO® Headrest Wall Storage Unit
Item no. 3013-00
81 cm x 94 cm
32" w x 37" h.

DORO® Lubricant HP500

Item no. 1001.999

HP500 6-pack

Item no. 1001.998

Autoclavable and precise in its application due to its needle-shaped tip.

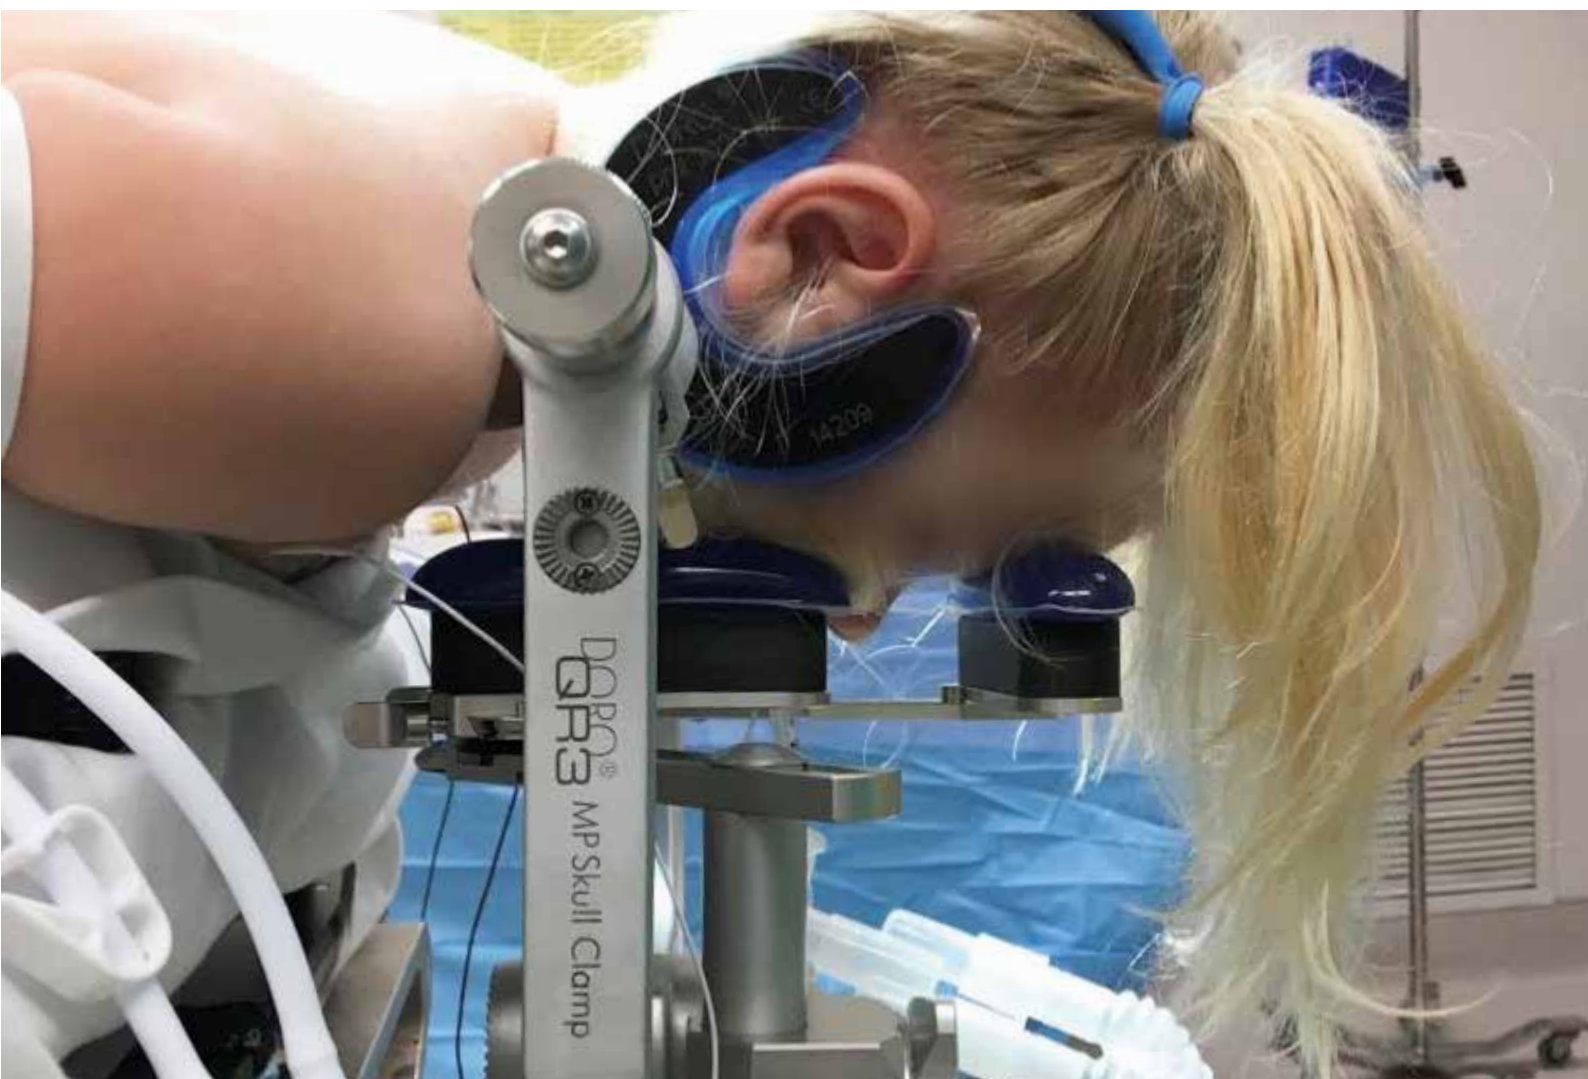

DORO® Multi-Purpose Skull Clamp

The DORO® Multi-Purpose Skull Clamp is our most versatile skull clamp. It offers all the beneficial features of the DORO® QR3 Skull Clamp and can be set-up for invasive or non-invasive procedures in adult as well as in pediatric cases. Since a children's skull is still growing and is, therefore, very vulnerable, neurosurgical solutions are needed which fit their needs. The DORO® Multi-Purpose Skull Clamp provides different kind of shapes and sizes of gel pads and pin holders. A specifically designed extension bar ensures a safe fixation of the children's head with an appropriate pin force, comprising a force scale up to 90N.

Which DORO® Multi-Purpose Skull Clamp System works for you?

That depends on the desired head positioning method. Have a look at the overview below for guidance.
The complete system configurations can be found on the following pages.

DORO® Multi-Purpose Skull Clamp – Invasive Set-Up Possibilities

Set-up the DORO® Multi-Purpose Skull Clamp as a classic 3-pin skull clamp for adult patients or apply the dedicated 90 N /20 lbs Extension Bar, head support and dual pin holders on both sides when treating pediatric patients. An interface for the direct connection of the PMT® Halo System is also available.

DORO® Abbott Multi-Purpose Skull Clamp System Pediatric, Item no. 3021-00

Included Items	Item no.
DORO® Disposable Skull Pins, Pediatric (36pcs)	3006-10
DORO® Pin Holder Pediatric	3020-01
DORO® Head Support (w/o Gel Pads)	3020-03
DORO® Multi-Purpose Skull Clamp	3020-50
DORO® Extension Bar 90N/20lbs	3020-52
DORO® Single Pin Holder	3020-55

DORO® Pin Holder Adult	3020-56
DORO® Gel Head Ring w/ Base 90 mm (3pcs)	3020-61
DORO® Pin Holder Adjustable, Pediatric	3020-62
DORO® Gel Head Ring w/ Base 140 mm	3020-63
DORO® Adjustment Key	3020-65
DORO® Gel Ear Ring w/ Base 90 mm (2pcs)	3020-68
DORO® Trio Gel Pad (adjustable)	3020-71
DORO® Storage Case MPSC System	3020-001

DORO® Multi-Purpose Skull Clamp – Non-Invasive Set-Up Possibilities

Choose from a variety of different gel pad shapes and sizes for optimal patient stabilization in non-invasive surgical procedures. All of the pads can either be mounted to the lateral receptacles at the skull clamp or to the head support for maximized flexibility in patient positioning.

DORO® Multi-Purpose Skull Clamp System Item no. 3020-00

Included Items	Item no.
DORO® Disposable Skull Pins, Pediatric (36pcs)	3006-10
DORO® Pin Holder Pediatric	3020-01
DORO® Head Support (w/o Gel Pads)	3020-03

DORO® Storage Case MPSC System	3020-001

Store it Safely

All DORO® Multi-Purpose Skull Clamp systems ship in a stable storage case.

Storage Case MPSC System
Item no. 3020-001
(shown with Multi-Purpose Skull Clamp and Accessories).

Cranial Stabilization

Imaging Solutions

Intra-operative imaging allows to run diagnostic imaging during surgical procedures to support decision making on how to proceed with the case at hand. Having experienced the complexity of different imaging methods and surgical approaches, we strive to provide technically advanced yet easy to use products.

Our solutions support various intra-operative imaging modalities.

Please find the respective icon for the supported intra-op imaging modalities on the individual product page.

Angiography

The best imaging method to examine vascular structures. This method also makes needle guidance and catheter placement easier by visualizing it. Angiography is often used in the context of Fluoroscopy and Digital Subtraction Angiography.

Computed Tomography

Used for a precise, three dimensional view. It is also applied to locate and determine the size of a tumor. The method can be further used for skeletal, high- and low-contrast as well as perfusion imaging.

Magnetic Resonance Imaging

The best solution to get detailed images of organs and tissues. MRI is particularly applied when soft tissue, perfusion or diffusion-weighted images are needed helping to assess blood vessels.

The DORO LUCENT® Headrest System is the cranial stabilization system of choice for all procedures applying X-Ray & iCT Imaging. It features the completely metal free DORO® Skull Clamp Radiolucent with its beneficial Quick-Rail® interfaces for a quick and easy attachment of navigation tracking devices, retractor systems and other accessories. The DORO LUCENT® Base Unit features a completely new and streamlined design and is also available in a compact version.

DORO LUCENT® Headrest System

Item no. 1101.020

Included Items	Item no.
DORO LUCENT® Disposable Skull Pins, Adult	1106.003
DORO LUCENT® Storage Case Headrest System	1101.030
DORO LUCENT® Base Unit	1101.021
DORO LUCENT® Locking Transitional Member	1101.031
DORO LUCENT® Transitional Member	1101.026
DORO® Swivel Adaptor Radiolucent	3033-00
DORO® Skull Clamp Radiolucent	3034-00

High-End Imaging

DORO LUCENT® Disposable Skull Pins are perfectly stable and reduce imaging artifacts to a minimum (page 16).

Rigid Fixation

Safely position the patient by means of the DORO® Skull Clamp Radiolucent.

Fitting

The system connects to almost all OR table side-rail types.

Adaptable

Compact Side Parts are additionally available.

DORO LUCENT® Headrest System

Item no. 1101.020

(shown with DORO LUCENT® Disposable Skull Pins, page 16).

Safe

The form fitting design of the base unit provides a stable base for the entire system.

Convenient Handling

Combined locking of transitional and sliding member.

Easy to Read Pressure Scale
Metric and imperial units.

Reduced Risk of Lacerations
No play between archholder and skull base when locked.

DORO® Skull Clamp Radiolucent
Item no. 3034-00
(shown with DORO LUCENT® Disposable Skull Pins, page 16).

Versatile

Quick-Rail® Technology enables you to attach accessories and retractor systems easily, quickly, and securely to the skull clamp.

Mix & Match

The DORO® Skull Clamp Radiolucent can be mounted to DORO® Aluminum Swivel Adaptor and Base Unit by means of the Mix & Match Adaptor #3033-50 (page 23).

Compact Version

Choose the DORO LUCENT® Headrest System that suits you best. If you need to keep a low profile, the DORO LUCENT® Base Unit Compact offers shortened side parts, minimizing the space between base unit and OR table.

DORO LUCENT® Base Unit Compact
Item no. 1101.022

This modification of our metal-free DORO® Skull Clamp Radiolucent is designed for spinal surgeries and can be mounted to all established spinal OR tables and spinal frames. The slim design allows the skull clamp to be lowered between the rails of the open frame, simplifying patient positioning and imaging procedures.

Standard DORO® Skull Clamp Radiolucent shown mounted to a MIZUHO OSI Insite® table.

DORO® Skull Clamp Radiolucent for Spinal Frames shown mounted to a MIZUHO OSI Insite® table.

Freedom in Patient Positioning

Unique shape allows lowering of the patient's head between the rails of an open frame OR table.

DORO® Skull Clamp Radiolucent for Spinal Frames
Item no. 4004.101

(shown with DORO LUCENT® Disposable Skull Pins, page 16).

Versatile

Quick-Rail® Technology enables you to attach accessories and retractor systems easily, quickly, and securely to the skull clamp.

Mix & Match

The DORO® Skull Clamp Radiolucent can be mounted to DORO® Aluminum Swivel Adaptor and Base Unit by means of the Mix & Match Adaptor #3033-50 (page 23) or to fitting counterparts of spinal frame table manufacturers.

Mix & Match

For Cranial Applications

Mix & Match the DORO® Skull Clamp Radiolucent with DORO® Aluminum Swivel Adaptors and Base Units.

DORO® Interface Skull Clamp
Radiolucent (to ALU Swivel Adaptor)
Item no. 3033-50

For Cranial and Cervical Spine Applications

Mix & Match the DORO® Radiolucent Skull Clamp and Swivel Adaptor with DORO® Aluminum Base Units.

DORO® Transitional Member
Radiolucent (to ALU Base Unit)
Item no. 3032-00

For Cervical Spine Applications

Mix & Match DORO® Aluminum Skull Clamps with the DORO® Radiolucent Swivel Adaptor, Transitional Member and Base Unit.

DORO® Interface Skull Clamp
Aluminum (to RDL Swivel Adaptor)
Item no. 3033-51

DORO® Radiolucent Horseshoes are the best choice for procedures that do not require a rigid fixation. The products come with an extension bar for skeletal traction. The horseshoes feature a Quick-Rail® interface for the quick connection of DORO COBRA® Retractor Arms.

Adult version

**DORO® Swivel Horseshoe Headrest Radiolucent
Adult, with Extension Bar**
Item no. 3036-00

Included Items	Item no.
DORO® Horseshoe Base Radiolucent with Extension Bar	3036-50

Pediatric, with Extension Bar**
Item no. 3035-00

Included Items	Item no.
DORO® Horseshoe Base Radiolucent with Extension Bar	3036-50
DORO® Horseshoe Pad, Pediatric, right	3008-10
DORO® Horseshoe Pad, Pediatric, left	3008-11

Versatile

Attach DORO COBRA® Retractor Arms by means of the DORO COBRA® Quick-Clamp for Radiolucent Quick-Rail® (page 37).

DORO® Horseshoe RS Headrest Radiolucent

Adult version

**DORO® Horseshoe RS Headrest Radiolucent,
Adult, with Extension Bar**
Item no. 3036-70

Included Items	Item no.
DORO® Horseshoe RS Base Radiolucent with Extension Bar	3036-71
DORO® Horseshoe Pad, Adult, right	3009-10
DORO® Horseshoe Pad, Adult, left	3009-11

Pediatric version

**DORO® Horseshoe RS Headrest Radiolucent,
Pediatric, with Extension Bar**
Item no. 3035-70

Included Items	Item no.
DORO® Horseshoe RS Base Radiolucent with Extension Bar	3036-71
DORO® Horseshoe Pad, Pediatric, right	3008-10
DORO® Horseshoe Pad, Pediatric, left	3008-11

Compact

Connect the Horseshoe RS directly to the DORO LUCENT® Transitional Member and benefit from a low profile.

DORO LUCENT® Horseshoe Headrest ENT

The DORO LUCENT® Horseshoe Headrest ENT is designed to match the specific needs of patient positioning for ear, nose and throat procedures. You can directly mount it to the DORO LUCENT® Transitional Member which allows a low profile by having the open part of the horseshoe facing away from the OR table.

Adult version

DORO LUCENT® Horseshoe Headrest ENT, Adult
Item no. 1101.007

Included Items	Item no.
DORO LUCENT® Horseshoe Headrest ENT, RDL w/o Gel Pads	1101.006
DORO® Horseshoe Pad, Adult, right	3009-10
DORO® Horseshoe Pad, Adult, left	3009-11

Shown mounted to the DORO LUCENT® Base Unit.

Pediatric version

DORO LUCENT® Horseshoe Headrest ENT, Pediatric
Item no. 1101.008

Included Items	Item no.

DORO® Horseshoe Pad, Pediatric, right	3008-10
DORO® Horseshoe Pad, Pediatric, left	3008-11

One Base Fits All

DORO® Horseshoe Bases share the same gel pad holder design. This means that all our horseshoe gel pads can be mounted to every horseshoe base in our portfolio. The innovative design of the DORO® Horseshoe Base gives you the opportunity to quickly, adapt these products to adult or pediatric applications by mounting the respective gel pads, ensuring the optimal set-up for each of your patients.

DORO LUCENT® Navigation Adaptors

DORO® Navigation Adaptors Radiolucent offer a safe and stable interface for navigation reference arrays from Stryker®, Medtronic and Brainlab. They are directly mounted over the sterile drape to the Quick-Rail® of the DORO® Skull Clamp Radiolucent. These adaptors allow a close positioning of the respective navigation reference array to the patients head while keeping the sterile field intact.

For Alphamaquet 1150 and Magnus 1180
and only in conjunction with MAQUET
Adaptor, MAQUET item no. 6005.25A0.

DORO® Transitional Member
Radiolucent, long (160 mm)
Item no. 3032-10

Compatible with DORO® Table Adaptors
Radiolucent, item nos 3031-50,
4003-00, 4004.001, 4004.002.

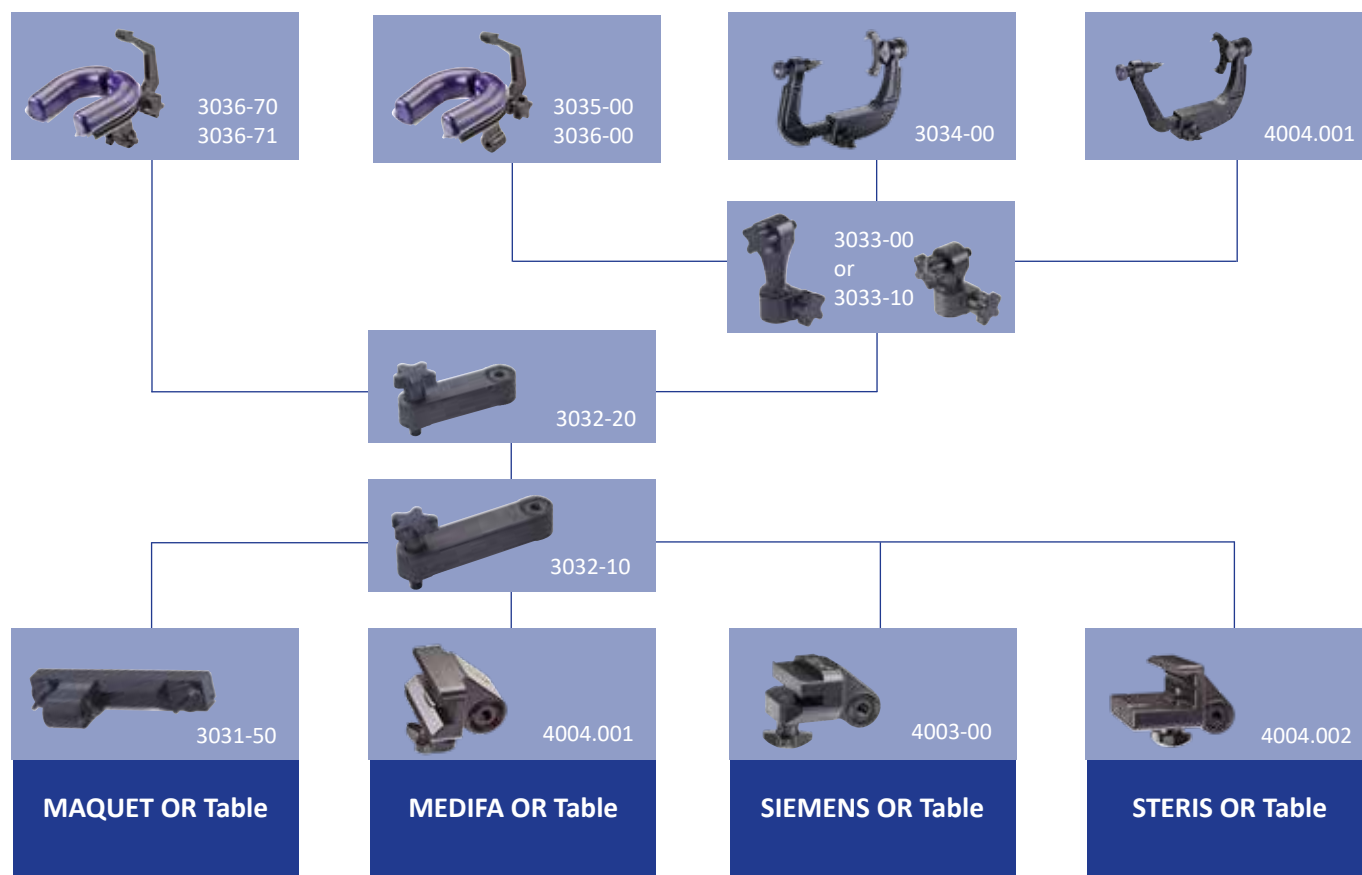

DORO® Transitional Member
Radiolucent, short (120 mm)
Item no. 3032-20

Compatible with DORO® Table Adaptors
Radiolucent, item nos 3031-50,
4003-00, 4004.001, 4004.002.

Which DORO® Radiolucent Table Adaptor set-up fits your needs?

Start with the OR table manufacturer at the bottom and work your way up to the DORO® solution that works best for you.

DORO LUCENT® iMRI Headrest Systems allow you to use all the beneficial features and the known workflow of a standard rigid 3-pin fixation in an iMRI environment. This technically advanced yet familiar-to-use product features a variant of our proven DORO® Skull Clamp Radiolucent which is mounted to the OR table's transfer board by means of the DORO LUCENT® iMRI Parallelogram Adaptor, giving you the freedom you need to properly position patients for surgery.

Familiar

The classic 3-pin skull clamp design with ratcheting system allows you to rely on your trained routine and known workflows.

High-End Imaging

DORO LUCENT® Disposable Skull Pins are perfectly stable and reduce imaging artifacts to a minimum (page 16).

Fast

Directly mountable to transfer boards of selected OR table manufacturers.

Flexible

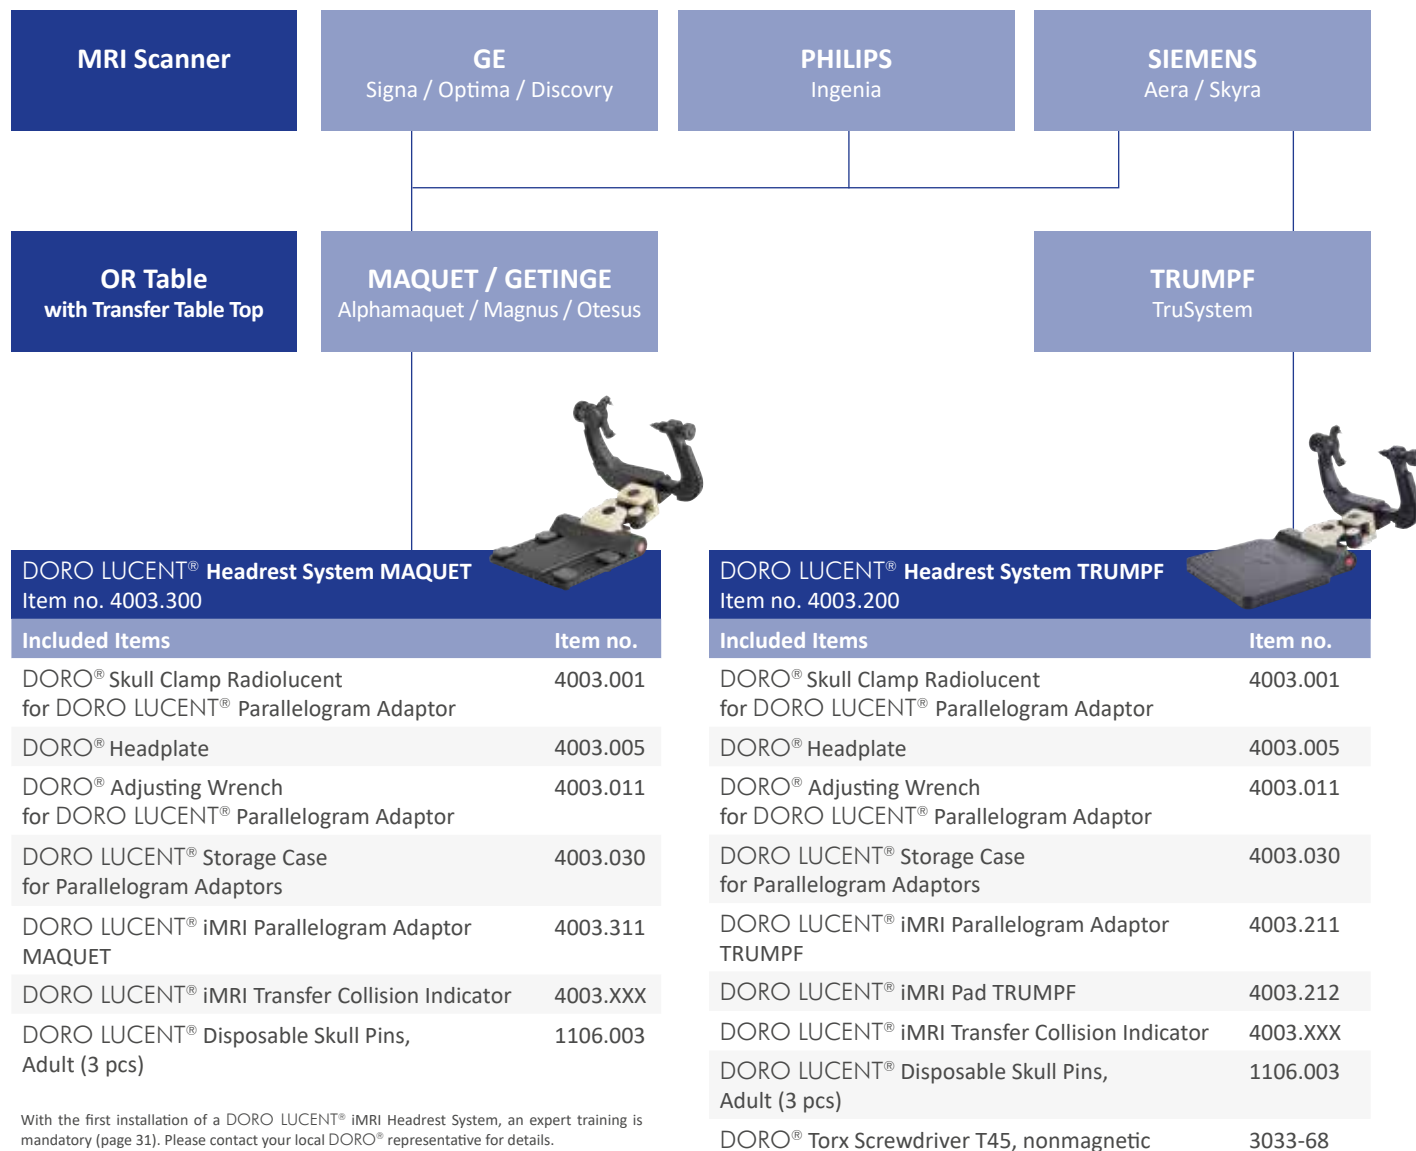

The parallelogram design supports you in properly positioning your patient for surgery.

DORO LUCENT® iMRI Headrest System
MAQUET
Item no. 4003.300

Which DORO LUCENT® iMRI Headrest System works for you?

Check the type of MRI scanner and OR table in your OR environment and compare it to the overview below to identify the DORO LUCENT® iMRI Headrest System that will fit your OR environment.

Movement Capabilities

DORO LUCENT® Parallelogram Adaptors allow you to shift, tilt, angle and rotate the skull clamp to always find a fitting position for your patient.

DORO LUCENT® iXI Headrest System

The DORO LUCENT® iXI Headrest System increases your diagnostic capabilities as it supports intra-operative MR, CT and Angio imaging. This enables you and your team to run diagnostics on bone and tissue within the same surgery, resulting in a more precise treatment with lower time consumption compared to separate imaging approaches.

State-of-the-Art

The DORO LUCENT® iXI Headrest System is a dedicated multimodality imaging solution designed for use with a MAQUET / GETINGE Magnus OR Tables and SIEMENS Nexaris Imaging Suites.

DORO LUCENT®
iXI Headrest System
Item no. 4003.500

Extendable

Quick-Rail® Technology enables you to attach accessories and retractor systems easily, quickly, and securely to the skull clamp.

Familiar

The classic skull clamp design lets you apply your known routines and workflows.

An Optimized Workflow

Position the patient as required for surgery before starting the actual pinning procedure with the DORO LUCENT® Headplate. This makes further movements of the sedated patient unnecessary, resulting in reduced procedural risk, less stress for the patient and increased convenience for you and your team.

With the first installation of a DORO LUCENT® iXI Headrest System, an expert training is mandatory (page 31). Please contact your local DORO® representative for details.

DORO LUCENT® Product Trainings

Dedicated products like the DORO LUCENT® iMRI or iXI Headrest Systems come as part of a larger iMRI or multimodality imaging installation. Before you start conducting live cases with these state-of-the-art products we will train you in their use. We explain functions, simulate workflows, and assist you in matching them to your distinct needs. These training sessions are held on site, in your facility, with you and your team, to offer the best possible education. DORO® application specialists will cover essential and advanced product knowledge and will match the training to your OR environment. The training will especially focus on overall system set-up & movement capabilities as well as patient positioning and clinical workflow subject to the respective imaging modality.

A blurred surgical scene. In the upper right, a hand in a blue glove holds a surgical instrument. Below it, a metal tray holds several surgical instruments, including a pair of scissors. The background is dark and out of focus, suggesting an operating room environment.

Retractor Systems

Surgeries are often connected to time-critical or stressful situations. Having to work under pressure demands the highest level of concentration. To enable you to focus on your work, we are driven to develop retractor systems which ease your workflow. Easy to set-up, convenient to use, comfortable as a hand rest, these systems will support you during the whole surgical procedure.

DORO LUNA® Retractor System

The DORO LUNA® Retractor System is made to support you in every surgery. Its open design allows you to always keep the curves parallel to the floor, independently of patient and skull clamp positioning. Tilt, shift and angle the system into any position you need and you will still be able to use the curves as a comfortable hand rest and retractor arm interface. The variability of the DORO LUNA® Retractor System can be further enhanced with additional adaptors, making it the most versatile retractor system to date.

The DORO LUNA® Retractor System is the winner of the 2015 Freiburg Innovation Award.

Convenient

Snap-on attachment of DORO COBRA® Flexible Rotary Arms on any desired position on the curve.

Supportive

Ergonomic design makes the DORO LUNA® Curve the optimal hand support. It can be positioned parallel to the floor, independently of skull clamp position.

DORO LUNA®
Retractor System Standard
Item no. 1203.100
(shown mounted to the
DORO® QR3 Skull Clamp)

Fast

DORO LUNA® attaches directly to the Quick-Rail®, even over multiple layers of sterile drape.

Easy

No extra tools are needed to mount and use DORO LUNA® Retractor Systems.

DORO LUNA® & DORO COBRA®
combined set-up mounted to the
DORO® Skull Clamp Radiolucent.

DORO COBRA® Retractor System

The DORO COBRA® Retractor System is the retractor system of choice for maximum visibility and access to the surgical site. DORO COBRA® Flexible Rotary Arms are directly mounted to the Quick-Rail® of either the DORO® QR3 Skull Clamp or the DORO® Skull Clamp Radiolucent. A combined set-up with DORO LUNA® components is possible and grants enhanced set-up and application possibilities.

DORO COBRA® Retractor System

Item no. 1203.109

DORO COBRA® Flexible Rotary Arms

DORO COBRA® Flexible Rotary Arms are smooth and very precise in their movement. Just clip them on their form-fitting counterparts like the DORO LUNA® Curve or the DORO COBRA® Quick-Clamps, mount a DORO® Brain Spatula and continue your procedure. All DORO COBRA® Retractor Arms share the ability to be quickly adjusted, even without releasing the arm's tension.

DORO COBRA® Flexible Rotary Arms

Available Items	Item no.
DORO COBRA® Flexible Rotary Arm 200 mm	1201.005
DORO COBRA® Flexible Rotary Arm 280 mm	1201.006
DORO COBRA® Flexible Rotary Arm 350 mm	1201.007
DORO COBRA® Flexible Rotary Arm 420 mm	1201.008

Quick Adjustments Under Tension

Even under tension, repositioning of the attached brain spatula is possible. Neither the tension of the retractor arm nor the stiffness of the brain spatula will be lost while doing so.

Flexible

Four different lengths and a 360° rotational body let you position the DORO COBRA® Flexible Rotary Arms precisely at the location where you need them, gaining a high visibility on your surgical site.

Fast to Mount

The Snap-On technology allows to quickly, and easily mount DORO COBRA® Flexible Rotary Arms.

DORO® Quick-Clamp with Starburst for Radiolucent Quick-Rail®

The DORO® Quick-Clamp with Starburst for Radiolucent Quick-Rail® serves as an intuitive interface* for devices used for example in frameless stereotactic or endoscopic procedures. Designed for use over the sterile barrier and form-fittingly connected to the proven Quick-Rail® of the DORO® Skull Clamp Radiolucent, the adaptor provides a stable and secure connection point for third party devices.

DORO® Quick-Clamp with Starburst
for Radiolucent Quick-Rail®
Item no. 3033-69

*The interface is designed to bear a max. load of 16.8 Nm (which equals a weight of 3.4 kg attached to a horizontally mounted, 50 cm long arm). It is validated for use with the Brainlab VarioGuide™. It is the responsibility of the user to verify that third party devices can safely be secured to the DORO® Quick-Clamp with Starburst for Radiolucent Quick-Rail®. The product is shown mounted to a DORO® Skull Clamp Radiolucent.

DORO® Quick-Clamp Halo Brain Retractor System

The DORO® Halo Retractor System features the classic halo ring design. You can easily attach it to the Quick-Rail® of DORO® QR3 Skull Clamps by means of the DORO® Quick-Clamp or to older skull clamp versions by means of the alternatively available C-Clamp. Rotary retractor arms, brain spatulas and accessories are available.

Adaptable

Adjust the halo ring to your needs. This provides angling, or half a ring can be removed completely.

Compatible

The DORO® Halo Retractor System fits almost all common skull clamps, either by means of the form-fitting Quick-Rail® interface or by means of the C-Clamp.
