B-Scan Plus® VS B-Scan Pro®

Features of Both Probes:

- Standard 1200x1200 pixels; 2x zoom without losing resolution
- Pre-defined folder for cine file and snapshot storage
- Change, gain, gamma table, TGC
- Play, pause, step forward, step backward through recorded cine loops
- Allows changes on crystal frequency, depth and cine loop length

- Display A-Vector on image
- Notes can be added on screen if needed
- Footpedal to start and stop scans
- 60º scanning angle
- 50mm and 100mm depth of range at 15MHz and 30mm and 60mm at 12MHz
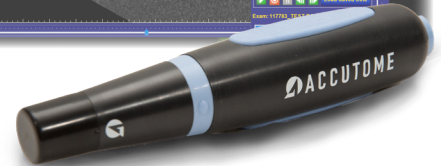

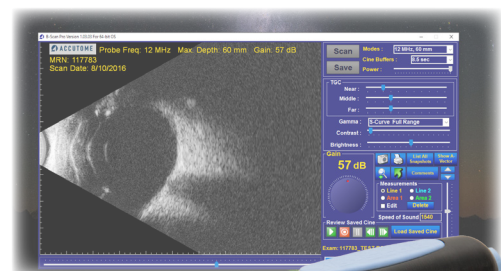

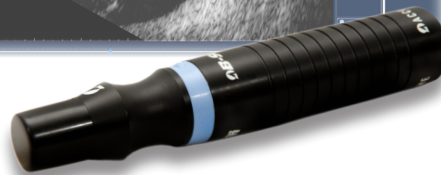

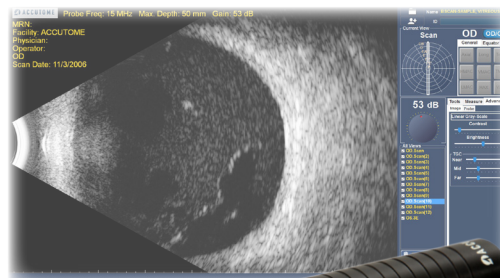

Comparison:

Features	B-Scan Plus	B-Scan Pro
Screen Size	Auto up to 1920x1200	Fixed to 1280x800
Editable Measurements	6 Lines, 2 Areas, 2 Angles, 2 Arrows	2 Distances, 2 Areas
